Building Safety Division

**SMOKE AND CARBON MONOXIDE DETECTOR SELF-CERTIFICATION**

**PROJECT INFORMATION**

PROJECT ADDRESS	PERMIT NUMBER
RELATIONSHIP TO PROJECT	
<input type="checkbox"/> PROPERTY OWNER <input type="checkbox"/> LICENSED CONTRACTOR <input type="checkbox"/> AUTHORIZED AGENT (SEPARATE FORM REQUIRED)	

**SELF - CERTIFICATION**

For the property located at the address listed, I understand that Smoke Alarms and Carbon Monoxide Alarms are required in conjunction with my permit. I also understand that prior to final inspection that the Building Inspector shall either verify their installation via means of inspection or acceptance of this form. Please note that permits cannot receive a final inspection approval without verification through one of these two means.

By utilization of this form, which I have read and fully understand the requirements of, I certify that the residence shown at the project address listed above now has fully functioning and compliant smoke alarms and carbon monoxide alarms in accordance with the California Residential Code and California Health and Safety Code (some sections summarized below).

California Residential Code (CRC) Section 314 requires that Smoke alarms are installed in existing dwellings anytime a building permit with a job valuation of more than \$1,000.00 is issued for an addition, repair or alteration.

California Residential Code (CRC) Section 315 requires that Carbon Monoxide (CO) alarms are installed in existing dwellings that have attached garages or fuel burning appliances anytime a building permit with a job valuation of more than \$1,000.00 is issued for an addition, repair or alteration. Furthermore, Health and Safety Code Section 17926 states that all single family dwellings that have attached garages or fuel burning appliances must have a CO alarm installed prior to July 1, 2011 and that all other dwelling units that have attached garages or fuel burning appliances must have a CO detector installed prior to January 1, 2013.

Smoke and carbon monoxide alarms shall be located outside each sleeping area, in the immediate vicinity of bedrooms and on every story of the dwelling; including basements and habitable attics (split levels are considered one story).

Additional smoke alarms are required in each sleeping room and any room with a closet.

The self-certification form may only be used if the interior of the dwelling will not be accessible to inspect the placement of smoke and CO alarms at the time of final inspection.
