SUMMARY

- In Q2, U.S. economic conditions were impacted by: (1) dramatically lower COVID-19 caseloads as vaccine inoculations accelerated, balanced with waning vaccine demand and the emergence of more infectious variants; (2) strong consumer data supported by ongoing fiscal stimulus measures; (3) elevated inflation fueled by surging economic activity amid labor and supply chain shortages; (4) a late-quarter hawkish signal from the Federal Reserve (Fed), as anticipation of bond purchase tapering gained traction and the timeline for expected rate hikes was pulled forward; and (5) the largest increase in corporate earnings estimates in nearly 20 years, which propelled major U.S. stock indices to all-time highs.
- With the public health situation drastically improving and pent-up consumer demand being released, the U.S. has seemingly turned the corner in its recovery. Due to the quicker-than-expected rebound, Federal Open Market Committee (FOMC) officials have suggested that they have started to contemplate the timing and communication around a potential tapering of asset purchases. The FOMC remains "attuned and attentive" to the inflation outlook amid supply shortages and other risk factors. In the updated June projections, 13 of 18 Fed officials indicated they expect to increase short-term rates by the end of 2023, up from seven who expected that outcome in March.
- Despite significant progress toward a comprehensive economic recovery, headwinds
 persist and mixed signals remain. Demand is recovering faster than supply, triggering
 supply chain bottlenecks and wage-price pressures. Inflation is rising sooner than in
 previous cycles, with core consumer prices recently showing the sharpest monthly increase
 since 1982. Despite some scary inflation headlines, many market participants believe that
 the economy's current wave of inflation is likely transitory in nature.
- Looking past this year, economists and strategists have moderated long-term growth
 projections as uncertainty remains a key characteristic of our current environment. Perhaps
 the term "cautious optimism" best describes the current mood as we near what we hope to
 be the final innings of the pandemic.

ECONOMIC SNAPSHOT

- Following a 4.3% expansion in Q4 2020, U.S. GDP increased 6.4% in Q2. The consumer
 continues to be the driving force behind recent GDP growth as consumer spending rose by
 11.4% in Q2, the second-fastest pace since the 1960s. Goods and services that benefit the
 most from the reopening of the economy, such as auto sales, food services and, travel
 accommodations, are the main contributors to the growth in spending.
- The U.S. labor market recovery is accelerating after a spring lull. Following a disappointing April
 jobs report, employers added over 580,000 and 850,000 jobs in May and June, respectively. The
 service sector led the job recovery in the first half of 2021 as leisure and hospitality accounted for
 1.6 million jobs created, or almost half of the year's payroll gains. The robust demand for workers
 pushed wages up by a brisk pace of 3.6% year-over-year (YoY).
- Surveys of manufacturing and services activity produced mixed signals this quarter. After
 reaching a record high in March 2021 of 64.7, the ISM Manufacturing PMI declined to 60.6
 by the end of Q2. Similarly, the ISM Non-Manufacturing PMI told a similar story, retracting
 from a record-high reading. The recent survey noted, "challenges with materials shortages,
 inflation, logistics and employment resources continue to be an impediment to business

- conditions." Despite these headwinds, both indices remain well above both the 50-point threshold that differentiates growth from contraction and long-term historical averages.
- On the housing front, existing home sales declined roughly 21% YoY largely due to inventory shortages. Stressed supply and demand dynamics are evidenced by the drastic changes seen in housing prices, which increased by 15% YoY. Mortgage rates pulled back from the climb seen earlier this year, as the 30-year mortgage rate finished the quarter at 2.93%, compared to last quarter's reading of 3.18%.

INTEREST RATES

- The U.S. Treasury yield curve flattened modestly over the quarter as longer term yields retraced some of their significant first quarter higher moves, and shorter term maturities inched higher from rock-bottom lows. Near quarter-end, short-term Treasury yields rose in response as the Fed raised by five basis points the interest it pays banks on excess reserves and its offering rate for overnight reverse repurchase agreements. An earlier-than-expected discussion by the FOMC of increasing the overnight target rate also contributed to Treasuries softening on the short end of the curve. Long-term yields fell as investors worried less about inflation over the long term. This view was encouraged in part by a more hawkish tone from the FOMC.
- As a result of a flattening curve, index returns were mixed for the quarter. Shorter-duration
 U.S. Treasury total return indices (three years and under) were generally flat, while longerduration indices posted strong positive returns. For example, the 3-month Treasury index
 returned 0% for the quarter, the 2-year Treasury index returned -0.1%, and the 10-year
 Treasury index returned 3.2%.

SECTOR PERFORMANCE

- Diversification away from U.S. Treasuries was again additive to performance in Q2. Broad
 global demand for yield has continued to push spreads of most bonds tighter. As a result, most
 investment-grade (IG) spread sectors showed positive excess returns. The lone exception was
 mortgage-related sectors, where expectations that the FOMC may begin tapering asset
 purchases caused mortgage-backed security (MBS) spreads to come under pressure and lift
 off from multi-year tights.
- The federal agency sector saw minimal spread widening of one to two basis points (0.01% to 0.02%), mostly concentrated in the longer duration part of the curve (past three years). Supply remains markedly light, limiting new buying opportunities within the sector. On the flipside, opportunistic selling opportunities are expected to persist for the foreseeable future.
- The taxable municipal sector, once again, was one of the best performing IG sectors during Q2. Municipals boosted relative portfolio performance over the quarter as strong demand for new issues and the general market reach for yield-pressured spreads tighter.
- IG corporates generated positive returns this quarter as spreads tightened due to the prospect
 of strong corporate earnings and supportive monetary policy. The continued demand for yield
 pushed spreads to retest multi-year lows despite an active new issue market.
- Federal agency-backed mortgage-backed security (MBS) excess returns were negative as FOMC-related selling pressure arrived near quarter end. Generally, all collateral and coupon structures underperformed with the exception of agency-backed commercial MBS (CMBS), which have continued to provide solid absolute and relative returns on a consistent basis over the past 18 months.

Portfolio Recap

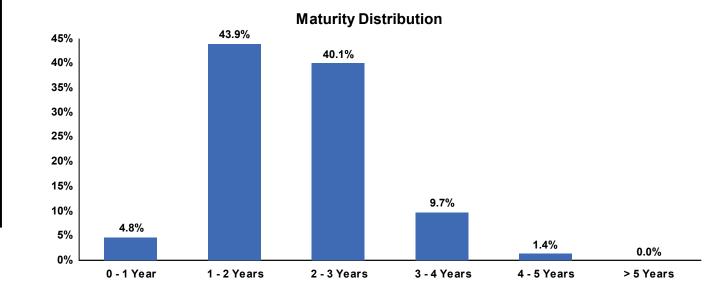

- Diversification away from Treasuries was again additive to performance, as most investment-grade non-governmental sectors produced positive excess returns relative to comparable-duration Treasuries, but by a smaller amount than in recent periods:
 - We maintained core allocations in most sectors and carefully managed risk as we considered inflationary pressures and Fed policy uncertainty.
 - The federal agency sector experienced 1 to 2 basis points (0.01% to 0.02%) of spread widening, concentrated in the 4-to 5-year and 7- to 10-year areas of the curve. Allocation to the sector was reduced modestly, locking in strong performance from agencies previously purchased over a year ago when spreads were wider.
 - Mortgage-backed securities (MBS) came under pressure late in the quarter as the Fed signaled that they were ready to
 "talk about talking about" asset purchase tapering. As a result, selling pressure pushed spreads wider, and the sector
 noticeably underperformed in June. The exception was the agency-backed commercial MBS (CMBS) sector which
 continued to provide solid absolute and relative returns. The portfolio's allocation to CMBS significantly lifted portfolio
 performance over the past several quarters, relative to other MBS alternatives.
 - In the supranational sector, where supply was available, the new issue market was the best entry point into the sector, as valuations appeared attractive relative to federal government alternatives.
 - Investment-grade corporates were aided over the quarter by the prospect of economic recovery, helped by further fiscal
 stimulus and supportive monetary policy globally. Credit spreads achieved new tights versus comparable-maturity
 Treasuries despite an active new issue market as investors continued to reach for yield. Like the agency sector, PFM
 engaged in opportunistic selling, reduced corporate bond holdings that had reached very expensive levels—largely those
 with less than two years remaining until maturity—and reinvesting in longer corporate issues, which captured value along
 the steeper portions of the curve.
 - Allocation to asset-backed securities (ABS) was reduced slightly over the quarter as we capitalized on attractive new
 issuance while opportunistically selling expensive holdings where appropriate. Similar to the corporate sector, investor
 appetite for new issue ABS continued to pressure spreads even lower and ABS spreads remained on the tight end of
 historical ranges. AAA Auto and Credit Card holdings outperformed Treasuries by a wide margin.
 - The taxable municipal sector once again provided a boost to relative portfolio performance over the quarter as strong demand for new issues and the general market reach for yield pressured spreads tighter still.

Investment Strategy Outlook

- The strong U.S. economic expansion is expected to persist, aided by a vaccine-driven reopening, pent-up consumer demand, and continued fiscal and monetary support. GDP expectations for 2021 have been revised upward, with current forecasts pointing to an annualized 6% growth this year. However, growing inflationary pressures may force the Fed's hand when considering tapering its bond purchases and, ultimately, future rate increases.
- Our outlook for major investment-grade sectors includes the following:
 - **Treasuries:** Current allocation provides opportunities to add to other sectors should spreads become more attractive. Portfolio rebalancing and duration extension trades are focused in the steepest portions of the curve. Along with income, yield curve roll-down should serve as a significant contributor to portfolio returns as the upside for pure price appreciation is quite limited.
 - **Agencies:** There is limited room for further spread tightening from current levels as spreads are in the single-digit range across most of the curve. With spreads likely to remain near zero over the coming quarter, the sector offers very little incremental yield compared to Treasuries. We will continue to reduce the allocation, realize gains where appropriate, and favor other sectors.
 - **Supranationals:** Spreads compared to similar-maturity Treasuries and agencies have value on an issue-specific basis, and the sector presents good opportunities as a government alternative. While new issue opportunities remain the best entry point, issuance is limited and is likely to dwindle through the summer.
 - Corporates: Continued economic recovery, supportive monetary policy, lower expected supply, and strong investor
 demand for high quality yield should serve as catalysts for good performance in the corporate sector. While historically
 tight spreads have encouraged us to position the allocation defensively, the sector still represents a core allocation to the
 portfolio.
 - Asset-Backed Securities (ABS): New issue activity was elevated to start 2021; however, investor appetite remains
 robust, and spreads have remained near their recent floor. Collateral performance in consumer sectors has been
 stronger than expected, and there is little expectation for any material change in the near term. With this outlook, we will
 look to modestly reduce holdings by attrition as holdings pay down.

Investment Strategy Outlook

- Agency MBS: The Fed continues "to support the smooth functioning" of the MBS market through its ongoing purchase
 program. After a surge in prepayments over the past year, a meaningful slowdown has occurred. Further, anticipation of
 Fed taper talk has started to pressure spreads wider. We view the combination of slower prepayments and wider
 spreads as positive developments and may begin to selectively add back allocations to the sector.
- **Taxable Municipals:** Taxable municipals have been a great alternative to corporates over the past year. While we still see opportunities in the sector, we have turned more cautious due to very tight spreads. Similar to other sectors, we may begin to opportunistically sell expensive holdings while continuing to evaluate new issues that come to market.

Issuer Distribution

IMPORTANT DISCLOSURES

This material is based on information obtained from sources generally believed to be reliable and available to the public; however, PFM Asset Management LLC cannot guarantee its accuracy, completeness or suitability. This material is for general information purposes only and is not intended to provide specific advice or a specific recommendation. All statements as to what will or may happen under certain circumstances are based on assumptions, some, but not all of which, are noted in the presentation. Assumptions may or may not be proven correct as actual events occur, and results may depend on events outside of your or our control. Changes in assumptions may have a material effect on results. Past performance does not necessarily reflect and is not a guaranty of future results. The information contained in this presentation is not an offer to purchase or sell any securities.

- Market values that include accrued interest are derived from closing bid prices as of the last business day of the month as supplied by Refinitiv, Bloomberg,
 or Telerate. Where prices are not available from generally recognized sources, the securities are priced using a yield based matrix system to arrive at an estimated
 market value.
- In accordance with generally accepted accounting principles, information is presented on a trade date basis; forward settling purchases are included in the monthly balances, and forward settling sales are excluded.
- Performance is presented in accordance with the CFA Institute's Global Investment Performance Standards (GIPS). Unless otherwise noted, performance is shown
 gross of fees. Quarterly returns are presented on an unannualized basis. Returns for periods greater than one year are presented on an annualized basis. Past
 performance is not indicative of future returns.
- Bank of America/Merrill Lynch Indices provided by Bloomberg Financial Markets.
- Money market fund/cash balances are included in performance and duration computations.
- Standard & Poor's is the source of the credit ratings. Distribution of credit rating is exclusive of money market fund/LGIP holdings.
- Callable securities in the portfolio are included in the maturity distribution analysis to their stated maturity date, although, they may be called prior to maturity.
- MBS maturities are represented by expected average life.

GLOSSARY

- ACCRUED INTEREST: Interest that is due on a bond or other fixed income security since the last interest payment was made.
- AGENCIES: Federal agency securities and/or Government-sponsored enterprises.
- AMORTIZED COST: The original cost of the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase
 date until the date of the report. Discount or premium with respect to short-term securities (those with less than one year to maturity at time of issuance) is amortized
 on a straight line basis. Such discount or premium with respect to longer-term securities is amortized using the constant yield basis.
- BANKERS' ACCEPTANCE: A draft or bill or exchange accepted by a bank or trust company. The accepting institution guarantees payment of the bill as well as the
 insurer.
- COMMERCIAL PAPER: An unsecured obligation issued by a corporation or bank to finance its short-term credit needs, such as accounts receivable and inventory.
- CONTRIBUTION TO DURATION: Represents each sector or maturity range's relative contribution to the overall duration of the portfolio measured as a percentage weighting. Since duration is a key measure of interest rate sensitivity, the contribution to duration measures the relative amount or contribution of that sector or maturity range to the total rate sensitivity of the portfolio.
- EFFECTIVE DURATION: A measure of the sensitivity of a security's price to a change in interest rates, stated in years.
- **EFFECTIVE YIELD:** The total yield an investor receives in relation to the nominal yield or coupon of a bond. Effective yield takes into account the power of compounding on investment returns, while nominal yield does not.
- FDIC: Federal Deposit Insurance Corporation. A federal agency that insures bank deposits to a specified amount.
- INTEREST RATE: Interest per year divided by principal amount and expressed as a percentage.
- MARKET VALUE: The value that would be received or paid for an investment in an orderly transaction between market participants at the measurement date.
- MATURITY: The date upon which the principal or stated value of an investment becomes due and payable.
- NEGOTIABLE CERTIFICATES OF DEPOSIT: A CD with a very large denomination, usually \$1 million or more, that can be traded in secondary markets.
- PAR VALUE: The nominal dollar face amount of a security.
- PASS THROUGH SECURITY: A security representing pooled debt obligations that passes income from debtors to its shareholders. The most common type is the
 mortgage-backed security.

GLOSSARY

- REPURCHASE AGREEMENTS: A holder of securities sells these securities to an investor with an agreement to repurchase them at a fixed price on a fixed date.
- **SETTLE DATE:** The date on which the transaction is settled and monies/securities are exchanged. If the settle date of the transaction (i.e., coupon payments and maturity proceeds) occurs on a non-business day, the funds are exchanged on the next business day.
- TRADE DATE: The date on which the transaction occurred; however, the final consummation of the security transaction and payment has not yet taken place.
- UNSETTLED TRADE: A trade which has been executed; however, the final consummation of the security transaction and payment has not yet taken place.
- U.S. TREASURY: The department of the U.S. government that issues Treasury securities.
- YIELD: The rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
- YTM AT COST: The yield to maturity at cost is the expected rate of return based on the original cost, the annual interest receipts, maturity value, and the time period from purchase date to maturity, stated as a percentage on an annualized basis.
- YTM AT MARKET: The yield to maturity at market is the rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
